The minimum parcel size for non-DNR managed lands represented on this map is 160 acres. Only major non-DNR administrative areas are labeled. All ownership is effective April 2000. Tidelands extending from mean high tide to extreme low tide are approximately 40% state owned and 60% privately owned. Beds of navigable waters below extreme low tide are all state owned.

Access to DNR's Natural Area Preserves is restricted to approved scientific research and educational uses. Many other public or tribal lands portrayed on this map are closed or have restricted entry and travel rules. Please observe all municipal, state, federal and tribal regulations.

Note To Map Users

Sources: Public land survey, county, state and international boundaries and Department of Natural Resources (DNR) managed lands are from DNR's Geographic Information System (DNRGIS). Non-DNR ownership is also from DNRGIS and is derived from U.S. Bureau of Land Management's ownership records or from digital and graphic data from other participating public agencies or Tribes. Washington Interstates, U.S. and State highways are from Washington Department of Transportation's database or maps. All other Washington roads are from DNRGIS. Out of state roads and hydrography are from 1:250,000 U.S. Geological Survey (USGS) or Natural Resources Canada quads. Washington hydrography is from Environmental Protection Agency's River Reach Data. Feature names are from USGS's Geographic Names Information System and other public agencies or Tribes.
